- 4) HEMALATHA.G

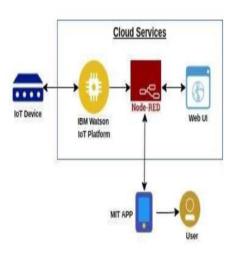

Data Flow Diagrams:

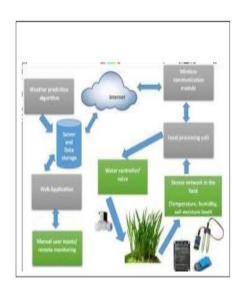

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example:

DFD Level 0

Example: (Simplified)

User Stories

Use the below template to list all the user stories for the product.

Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
IoT devices	USN-1	Sensors and wi-fi module		High	Sprint-1
Software	USN-2	IBM Watson IoT platform, Workflows for IoT scenarios using Node-red		High	Sprint-2
MIT app	USN-3	To develop an application using MIT		High	Sprint-3
Web UI	USN-4	To make the user to interact with the software.	User can access the app for the services.	High	Sprint-4
	Requirement (Epic) IoT devices Software MIT app	Requirement (Epic) IoT devices USN-1 Software USN-2 MIT app USN-3	Requirement (Epic)	Requirement (Epic)	Requirement (Epic) Number IoT devices USN-1 Sensors and wi-fi module High Software USN-2 IBM Watson IoT platform, Workflows for IoT scenarios using Node-red High MIT app USN-3 To develop an application using MIT High Web UI USN-4 To make the user to interact with the software. User can access the app High
