SRI SAIRAM ENGINEERING COLLEGE

SMART FARMER – IoT ENABLED SMART FARMING APPLICATION

PROBLEM SOLUTION FIT

TEAM MEMBERS:

1) PADHMASHREE.S
2) JYOTI PAL
3) HEMA MALINI.S
4) HEMALATHA.G

1. CUSTOMER SEGMENT(S)

The customer who are going to use this project includes
Large Scale Farmers
Small Scale Farmers

6. CUSTOMER CONSTRAINTS

Lack of proper irrigation facilities, production machinery, and access to institutional credit, difficulties procuring inputs and storing products, and negative impacts of climate were identified as the major constraints to agricultural productivity

5. AVAILABLE SOLUTIONS

Precision Agriculture, Crop Monitoring, Irrigation Management, Fertilizer Management Weather Forecasting are best solutions for provided for the farmers.

2. JOBS-TO-BE-DONE / PROBLEMS

Iot devices connects and interacts with each other,and the internet which means they can work together to send alert or automate other things such as sprinkler in an orchard

9. PROBLEM ROOT CAUSE

RC

By adopting Iot in the agricultural sector we get numerous benefits,but still, there are challenges faced by IoT in agricultural sectors.

7. BEHAVIOUR

The customer wants to make the revolutionary propagation in the rating of the irrigation through the reliability of amount of water availability on the land.

3. TRIGGERS

Smart farming reduces the ecological footprint of farming

4. EMOTIONS: BEFORE / AFTER

Turning the face of conventional agriculture methods by not only making it optimal but also making it cost efficient for farmers and reducing crop wastage

10. YOUR SOLUTION

Our solution for this project is the smart irrigation facilities using IoT based on moisture and temperature

8. CHANNELS of BEHAVIOR

The channels of behavior recombine the ratio of the following
Online
Offline
